

Make your health a priority

Get your flu shot and other routine vaccines

Flu shots

The flu affects millions of people each year and can lead to serious illness, or even death. The flu can be a contagious illness caused by influenza viruses that infect the lungs, throat and nose. According to the Centers for Disease Control and Prevention (CDC), one of the best ways to prevent the flu is by getting vaccinated each year.¹ The CDC recommends a yearly flu vaccine for everyone 6 months of age and older, as the first and most important step in protecting against this serious disease.²

Routine vaccines

You can also keep yourself and your family members healthy with routine vaccines that prevent illnesses like tetanus, pneumonia and shingles. Routine vaccines are available on most plans, and can help you and your family maintain better overall health.

Easy access to flu shots and other vaccines

OptumRx works with many national pharmacy chains to provide members easy access to flu shots and other routine vaccines. Plus, members get the highest level of benefit coverage (100% for many plans) when they get vaccines at pharmacies in the Vaccine Immunization/Injection Network.³

Many vaccines are available on a walk-in basis. Show your member ID card before getting your flu shot or vaccine. Most plans cover routine vaccines at 100% when you use network pharmacies.

See the pharmacy list on page 2.

For more information sign in to **optumrx.com** or call the number on your member ID card.

Retail pharmacies

This list shows the larger retail chain pharmacies in our network, but is not the full list. For a more complete list, you can log in to [optumrx.com](https://www.optumrx.com) or call the number on your health plan or prescription ID card. Pharmacists give the vaccines at these locations.
